VIROLOGY

Volume 245, 1998

Academic Press

Cytotoxic T Cells and Neutralizing Antibodies Induced in Rhesus Monkeys by Virus-like Particle HIV Vaccines in the Absence of Protection from SHIV Infection — Ralf Wagner, Vera J. P. Teeuwsen, Ludwig Deml, Frank Notka, Anthonius G. M. Haaksma, Sunita S. Jhagjhoorsingh, Henk Niphuis, Hans Wolf, and Jonathan L. Heeney 65

Different HTLV-I Neutralization Patterns among Sera of Patients Infected with Cosmopolitan HTLV-I — S. Blanchard, T. Astier-Gin, D. Moynet, E. Edouard, and B. Guillemain 90

Immunization with a Recombinant Envelope Protein (rgp90) of EIAV Produces a Spectrum of Vaccine Efficacy Ranging from Lack of Clinical Disease to Severe Enhancement — Michelle L. Raabe, Charles J. Issel, Sheila J. Cook, R. Frank Cook, Bruce Woodson, and Ronald C. Montelaro 151

The Hepatitis B Virus Seroconversion to Anti-HBe Is Frequently Associated with HBV Genotype Changes and Selection of preS2-Defective Particles in Chronically Infected Children — Patrick R. Gerner, Michael Friedt, Robert Oettinger, Ekkehart Lausch, and Stefan Wirth 163

Emerging Viruses/Unconventional Agents

Release of Viral Glycoproteins during Ebola Virus Infection — Viktor E. Volchkov, Valentina A. Volchkova, Werner Slenczka, Hans-Dieter Klenk, and Heinz Feldmann 110

Author Index for Volume 245, Number 1 182

Number 2, June 5, 1998

Rapid Communication

Genetic Stability of Sabin 1 Strain of Poliovirus: Implications for Quality Control of Oral Poliovirus Vaccine — Gennady V. Rezapkin, William Alexander, Eugenia Dragunsky, Monica Parker, Kitty Pomeroy, David M. Asher, and Konstantin M. Chumakov 183

Virus Replication/Gene Expression

The Predominant eIF4G-Specific Cleavage Activity in Poliovirus-Infected HeLa Cells Is Distinct from 2A Protease — Michael L. Bovee, Wilfred E. Marissen, Miguel Zamora, and Richard E. Lloyd 229

Direct Cleavage of eIF4G by Poliovirus 2A Protease Is Inefficient *in Vitro* — Michael L. Bovee, Barry J. Lamphear, Robert E. Rhoads, and Richard E. Lloyd 241

The cAMP-Dependent Protein Kinase A and Protein Kinase C-β Pathways Synergistically Interact to Activate HIV-1 Transcription in Latently Infected Cells of Monocyte/Macrophage Lineage — Mohammed F. Rabbi, Lena Al-Harthi, Mohammed Saifuddin, and Kenneth A. Roebuck 257

DNA Sequences outside the Simian Virus 40 Early Region Cause Downregulation of T-Antigen Production in Permissive Simian Cells — Frank J. O'Neill, Helen Carney, Yaoxiong Hu, and Tong Chen 289

Characterization of the Two Overlapping Papain-like Proteinase Domains Encoded in Gene 1 of the Coronavirus Infectious Bronchitis Virus and Determination of the C-Terminal Cleavage Site of an 87-kDa Protein — K. P. Lim and D. X. Liu 303

Characterization of the Interactions among Vaccinia Virus Transcription Factors G2R, A18R, and H5R — E. Penelope Black, Nissin Moussatche, and Richard C. Condit 313

HHR23A, the Human Homologue of the Yeast Repair Protein RAD23, Interacts Specifically with Vpr Protein and Prevents Cell Cycle Arrest but Not the Transcriptional Effects of Vpr — Alexander Gragerov, Tomoshige Kino, Galina Ilyina-Gragerova, George P. Chrousos, and George N. Pavlakis 323

High-Temperature Inducible Cell-Free Transcription and Replication of Double-Stranded RNAs within the Parasitic Protozoan *Cryptosporidium parvum* — Nikolai V. Khramtsov and Steve J. Upton 331

Differential Association of Uracil DNA Glycosylase with SIV_{SM} Vpr and Vpx Proteins — Roger Sleigh, Mark Sharkey, Margaret A. Newman, Beatrice Hahn, and Mario Stevenson 338

Identification of Two Replicons in Phage-Plasmid P4 — Arianna Tocchetti, Stefania Serina, Susanna Terzano, Gianni Dehò, and Daniela Ghisotti 344

Vaccinia Virus Nucleoside Triphosphate Phosphohydrolase I Is an Essential Viral Early Gene Transcription Termination Factor — Linda M. Christen, Michelle Sanders, Christie Wiler, and Edward G. Niles 360

Virus Structure and Assembly

A Surface Immunodeterminant of Human Papillomavirus Type 16 Minor Capsid Protein L2 — Kei Kawana, Koji Matsumoto, Hiroyuki Yoshikawa, Yuji Taketani, Takashi Kawana, Kunito Yoshiike, and Tadahito Kanda 353

Virus–Cell Biology

Adenovirus VAI RNA Antagonizes the RNA-Editing Activity of the ADAR Adenosine Deaminase — Ming Lei, Yong Liu, and Charles E. Samuel 188

Cyclophilin A Modulates Processing of Human Immunodeficiency Virus Type 1 $p55^{Gag}$: Mechanism for Antiviral Effects of Cyclosporin A — Daniel N. Streblow, Moiz Kitabwalla, Miroslav Malkovsky, and C. David Pauza 197

Subcellular Localization and Some Biochemical Properties of the Flavivirus Kunjin Nonstructural Proteins NS2A and NS4A — Jason M. Mackenzie, Alexander A. Khromykh, Malcolm K. Jones, and Edwin G. Westaway 203

Three Active Forms of Aspartic Proteinase from Mason–Pfizer Monkey Virus — Aleš Zábranský, Martin Andreánsky, Olga Hrušková-Heidingsfeldová, Vladimír Havlíček, Eric Hunter, Tomáš Ruml, and Iva Pichová 250

Viral Pathogenesis and Immunity

Genetic Stability of Sabin 1 Strain of Poliovirus: Implications for Quality Control of Oral Poliovirus Vaccine — Gennady V. Rezapkin, William Alexander, Eugenia Dragunsky, Monica Parker, Kitty Pomeroy, David M. Asher, and Konstantin M. Chumakov 183

Mouse Adenovirus Type-1 Replication Is Restricted to Vascular Endothelium in the CNS of Susceptible Strains of Mice — Peter C. Charles, Jack D. Guida, Celia F. Brosnan, and Marshall S. Horwitz 216

The Role of IL-10 in Mouse Hepatitis Virus-Induced Demyelinating Encephalomyelitis — Mark T. Lin, David R. Hinton, Beatriz Parra, Stephen A. Stohlman, and Roel C. van der Veen 270

Characterization of a Linear Epitope in the Nonstructural Region 4 of Hepatitis C Virus with Reactivity to Seroconversion Antibodies — Ulla Wienhues, Hans-Georg Ihlenfeldt, Christoph Seidel, Urban Schmitt, Wolfgang Kraas, and Günther Jung 281

Author Index for Volume 245 372
